Professional Summary

Full-Stack Developer with 1.7+ years of experience building scalable web applications using React.js, Angular, Node.js, Express.js and modern JavaScript technologies. Experienced in responsive UI development, REST API integration, SaaS platforms, and Agile delivery. Familiar with Java and Spring Boot application architecture, backend API integration, and enterprise workflows. Currently pursuing an Agentic AI Engineering course and expanding expertise in LLM-powered applications.

Experience

LDT Technology

Sep 2024 – Present

Full-Stack Developer

- Developed scalable web applications using React.js, Angular, TypeScript, JavaScript, Tailwind CSS and Next.js.
- Built reusable UI components and integrated REST APIs with Node.js backend services.
- Collaborated with Java Spring Boot backend teams to integrate APIs, debug issues and support enterprise features.
- Contributed to SaaS applications including appointment management, hotel booking, communication and multi-tenant e-commerce platforms.
- Implemented authentication, role-based access control, responsive dashboards and performance optimizations including lazy loading, caching and code splitting.
- Participated in Agile ceremonies, code reviews, debugging and production deployments.

Projects

Krew – Multi-Consultancy SaaS

React.js, Node.js, Express.js, WebSocket, Tailwind CSS

- Built a real-time consultancy platform with chat, notifications and video communication.
- Developed responsive dashboards and reusable UI components.
- Implemented authentication, REST APIs and caching for improved performance.

Appointment Management System (AMS)

React.js, Node.js, Express.js

- Led development of appointment scheduling with booking, cancellation and rescheduling.
- Built backend APIs and optimized application performance using lazy loading and efficient queries.
- Designed responsive interfaces following modern UI/UX practices.

Multi-Tenant E-Commerce Platform

- Built SaaS platform enabling merchants to launch branded online stores.
- Designed scalable data models and optimized REST APIs.
- Implemented secure authentication and API communication.

JUA – Hotel Booking Platform

- Developed booking workflows with real-time room availability.
- Integrated APIs for bookings, notifications and user management.
- Built responsive React interfaces with Zustand state management.

Technical Skills

Languages: JavaScript, TypeScript, Java, SQL, HTML5, CSS3
Frontend: React.js, Angular, Next.js, Redux, Context API, Zustand, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, Spring Boot (Working Knowledge), REST APIs, WebSocket
Database: MongoDB, MySQL
Tools: Git, GitHub, Docker, Redis, Maven, Postman, VS Code
Concepts: Authentication, JWT, RBAC, Microservices, API Integration, Performance Optimization, Agile

Education

Master of Computer Applications (MCA) – Kurukshetra University	2025
78%	
Bachelor of Computer Applications (BCA) – Kurukshetra University	2023
76%	

Certifications

- Agentic AI Engineering (In Progress – Near Completion)
- Web Development Certification – Internshala

Achievements

- Secured Top 10 university ranks in multiple semesters at Kurukshetra University.
- Delivered multiple SaaS-based full-stack applications across communication, booking and e-commerce domains.
